## Proposed Northern Lehigh School District Special Education Comprehensive Plan:

Over the past several months the Northern Lehigh School District's Office of Special Education has facilitated the development of a district Special Education Comprehensive Plan. A district level planning committee was formed to assist in the development of the Special Education Comprehensive Plan. Key staff members and representatives as outlined by the PA Department of Education have participated in the development of the plan to ensure that multiple perspectives were considered.

The period of public review and comment on the plan will continue until April 5, 2024. If you have any comments or questions about the plan, please contact Michele Dotta, Director of Special Education, at 610-767-9848 or mdotta@nlsd.org. The plan will be presented to the Board of School Directors for approval on April 8, 2024. It will be submitted to the Pennsylvania Department of Education by May 1, 2024 for review and approval.

District has completed all monitoring corrective action/improvement plans.

## Identification Method

Identify the District's method for identifying students with specific learning disabilities
Discrepancy Model

| Building Name | AUN | Branch Number | RTI | Approved RTI Use |
| :--- | :--- | :--- | :--- | :--- |

## Non-Resident Students Oversight

1. Is your district currently a host district for a $\mathbf{1 3 0 6}$ facility?

No

1. Describe the host's educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the $\mathbf{1 3 0 6}$ facility? (If not a host, answer as if you were.)
The district is aware that should such an institution move into our district we would work collaboratively with said institution to ensure we continue to meet our established Child Find and FAPE obligations. For the students who would attend the institution, we the district would make sure that all students are being educated in their least restrictive environment (LRE) based upon their level of support needed as well as their specially designed instruction. Upon entrance into a 1306 facility, a new student would be registered at the appropriate neighborhood school (Elementary, Middle or High School) within 5 business days. All relevant educational records would be reviewed or requested from the previous school district. If the student is an identified special education student, all documents would be reviewed by the Director of Special Education, in collaboration with the parents, to determine appropriate comparable programming. Once programming is decided, the IEP team then would determine the appropriate supports and services needed in the least restrictive environment for the student. Any changes/ revisions to the IEP would be made at that time. All current information from any medical teams would be considered. Parents would be invited to be part of all IEP team decisions and meetings. The district will ensure that a certified special education teacher will provide instruction in accordance with the IEP supports and services. If a regular education student is thought to be eligible for services, a permission for evaluation would be sought from the student's parent/guardian. All special education procedures and time lines are followed consistent with special education regulations throughout the process.
2. Describe the district's procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?
If a 1306 facility were to move into the district, the LEA will participate in all meetings and educational decisions as they would with any student that is a resident of Northern Lehigh School District. The LEA would participate in all IEP meetings, evaluation meetings, and any other meetings held to support the educational needs of the student. These decisions will be made in the best interest of the student in regards to all educational decisions including transition and future educational placements. Currently, there are no barriers that limit the district's ability to meet its obligations under Section 1306 of the Public School Code. Communication between the home district and the host district would be on-going. The district would collaborate through email, google meets and or collaborative phone conversations.

## Incarcerated Students Oversight

1. Does the district have an adult correctional facility that houses juveniles within its geographical boundaries? No
2. Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).
The district is aware that should such an institution move into our district, the LEA would work collaboratively with that institution to ensure the district continue to meet our already established Child Find and FAPE obligations. The district follows PDE 4605 Determination of District of Residence for Students in institutions in accordance with Section 1306 of the School Code. Communication is established between the district and the provider of the educational services. The district maintains financial responsibility for the education of identified incarcerated youth and adults.

## Least Restrictive Environment

1. Review the district's data for Least Restrictive Environment. Highlight areas of improvement.

Our goal at Northern Lehigh is to increase our LRE and/or remain above the State Percentage SPP Indicator of education inside the regular class $80 \%$ or more of the time. Upon review of the 2022-2023 SEDR Report, the Northern Lehigh School District is under the state average of Special Education in the regular class $80 \%$ or more by $11.9 \%$. For students being educated in the regular class for less than $40 \%$ of the time, Northern Lehigh School District is above the state average by $2.7 \%$. The Northern Lehigh School District will continue to provide quality programs and services to students with disabilities within the least restrictive educational environment.
2. What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?
All related services with the exception of transportation, BCBA, social worker, occupational therapy and speech and language therapy are contracted with the IU. The district contracts BCBA, social worker, occupational and speech and language services from Pediatric Therapeutic Services. Both special education and regular education staff collaborate to provide supplemental aids and services, as well as standards aligned curriculum. Supplementary aids and services that are available to students are as follows (not all inclusive list): -Modified curricular -Adapted, modified, and/ or alternative tests, assignments, and/or homework -Assistive technology -Adapted materials at the students' instructional level -Use of research based direct instruction alternative curriculum -Study guides to aid in chunking material -Flexible grouping -Alternative testing area -Preferential seating -Adaptive equipment -Social skills instruction -Scheduled positive reinforcement -Positive behavior support plans -Monthly and/or weekly collaboration among district and IU staff -Co-teaching Both elementary and secondary buildings have implemented the SWPBS program in all three tiers. The school district is contracted with a school social worker which has proven to be extremely valuable with the immense increase of mental health services. The district has also established a relationship allowing for Nulton Diagnostics to provide on site mental health services in each of the four school buildings. The school district has made a commitment to increase inclusionary practices for all students with disabilities. District employees are trained in verbal de-escalation strategies to diffuse potential crisis situations. As well, every building has a designated crisis team who are trained in de-escalation and physical intervention should student behavior become a threat to self or others. Select building regular education teachers, special education teachers, paraprofessionals, and administrators are certified in Non-Violent Crisis Intervention (NCI). Refreshers take place every year. Building crisis teams are re-certified every two years and meet with the NCI district trainers after every restraint.
3. Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.
Northern Lehigh has Learning Support, Life Skills Support and Emotional Support programs at every grade level. The high school and Slatington Elementarhy has co-taught classes, and so as a result, our students are integrated more into the general curriculum in a regular education classroom. K-12 Learning Support and Emotional Support students are fully included for science, social studies, and non-academic subjects. Many of our learning support students are integrated into math, reading, and English. Carbon Lehigh Intermediate Unit, Behavioral Health Associates, and The Centennial School of Lehigh University programs are utilized for students who are in need of specialized supports and services that are not able to be provided by district run programs. Northern Lehigh staff from K-6 have been trained in Wonders for reading. Learning Support staff also implements HMH The Code and Read 180 for reading, English, and phonics in grades $3-12$. Northern Lehigh has implemented E-Visions interactive math program for grades K-1 and Eureka math program for grades 2-6. Learning Support staff from grades 4-12 were trained and currently implement HMH Math 180 math program.
4. Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.
All students, including those that are being educated in alternative placements, are encouraged to participate in after school activities. The LEA continues to provide supplementary aids and services to students with disabilities
interested in extracurricular activities. Instructional assistants, nurses, and transportation are also provided if in the IEP. Staff encourage students with disabilities to join after school activities.
5. Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?
An LEA representative attends every IEP meeting, including those held in locations outside the district, to ensure that every eligible student is provided the support and services necessary to remain included with non-disabled peers to the maximum extent possible. During the meetings, the team makes every effort to ensure that students with disabilities are educated with their non-disabled peers and are removed from the regular education environment only when the child's education in that setting with supplementary aids and services is not showing meaningful progress. All Students, including those that are being educated in alternative placements, are encouraged to participate in after school activities. These activities are posted on the district website. All supports and services that are in a students IEP are provided in order to allow the student to participate in any extracurricular activity. This can include but is not limited to a nurse, paraprofessional, specialized transportation.
6. Discuss the district's need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)
The LEA continues to expand the district run supports. The Director of Special Education looks at caseloads of all students in the district, as well as outplaced students, in order to evaluate need for programs. The district recently started a full time emotional support classroom due to the increasing need for emotional support services. The LEA also attends all IU facility meetings in order to have input into what programs need to be developed for the hard to place students. The LEA has developed a partnership with Nulton Diagnostic and Treatment Center to provide on site mental health in all of the district buildings.

AR 113.2 Pg. 1 - Copy.doc
AR 113.2 Pg. 2 - Copy.doc

## 1. How does the district support the emotional, social needs of students with disabilities?

Students with disabilities are educated in the least restrictive environment (LRE) in accordance with their Individualized Education Program (IEP), and are only placed in settings other than the regular education class when the nature or severity of the student's disability is such that education in the regular education class with the use of appropriate supplementary aids and services cannot be achieved satisfactorily and cannot meet the needs of the student. The IEP team for a student with a disability should develop a Positive Behavior Support Plan (PBSP) if the student requires specific intervention to address a students social-emotional behaviors that interfere with their learning. The identification, evaluation, and plan or program will be conducted and implemented in accordance with state and federal law and regulations.
2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.
Our district has two certified Nonviolent Crisis Intervention instructors. Teachers, paraprofessionals and building administrators are trained in verbal de-escalation techniques as well as non-violent physical crisis intervention. The staff will be scheduled to recertify every year in order to maintain knowledge of the strategies through refreshers and reviews. The building level crisis teams are certified in verbal de-escalation, personal safety and restraints. Moreover, crisis teams recertify yearly to review incidents, revise procedures, and to retrain to ensure the strategies implemented (verbal or physical) are appropriate and effective. The district has also implemented a Threat Assessment Team at each school building to address threats to self or others. This team addresses threats and supports for students through a team approach. The district is also utilizing consulting and training with experienced staff from The Centennial School of Lehigh University to help with challenging behaviors throughout the 2023-2024 and 2024-2025 school year.
3. Describe the district positive school wide support programs.

School-Wide Positive Behavior Interventions and Supports is an evidence-based, cost-effective, systems approach for establishing the social culture needed for schools to be effective learning environments for all students. All schools in the district implement SWPBS and use the three-tiered approach of Tier 1 interventions (for all students and settings), Tier 2 interventions (for students who are at-risk), and Tier 3 interventions (for individual students needing specialized assistance). In the Northern Lehigh School District, Slatington Elementary School earned the Universal (Tier1) Initial Implementation With Fidelity award from the state for the 2022-2023 school year. Peters Elementary School earned the Universal (Tier 1) Sustained Implementation With Fidelity award from the state for the 2022-2023 school year. The SWPBS team at all buildings meet on a minimum of a monthly basis to review data in order to identify patterns of specific behaviors, locations, and/or times of day in which behavior problems tend to occur. This data is used to target intervention efforts (e.g., reteaching or booster sessions, increasing or modifying reinforcers). The data is also used to identify students who may be in need of increasing levels of intervention. The evidence-based intervention, Check-In Check-Out (CICO), is used as a Tier 2 intervention strategy. Other Tier 2 interventions include social-emotional (e.g., lunch bunch) and academic groups. Students who do not respond favorably to Tier 2 interventions are referred to a Board Certified Behavior Analyst, who conducts a brief Functional Behavior Assessment (FBA) in order to develop an individual Behavior Intervention Plan (BIP).
4. Describe the district school-based behavior health services.

Mental health concerns are addressed through, but not be limited to; SAP, Nulton Diagnostic, Guidance, School Psychologist and a contracted social worker. The district has created an emotional or mental health safety plan to support a student and the student's family if the student has been identified as being at increased risk of self-harm or identified as a safety risk through our Threat Assessment Team. For students with disabilities who are identified as being at risk of harming themselves or who have attempted, the appropriate team shall be notified and shall address the student's needs in accordance with applicable law, regulations and Board policy. Every building has a trained Threat Assessment Team, who collaboratively identifies and assesses students who may pose a safety risk. If a student is identified as being at risk of harming themselves, others, or have attempted self-harm and the student may require special education services or accommodations, the Director of Special Education shall be notified and shall take action to address the student's needs in accordance with applicable law, regulations and Board policy. The district also contracts a Board Certified Behavioral Analyst who supports staff, completes Functional Behavioral Assessments, classroom behavior plans, Positive Behavioral Support Plans, and has gone into the homes to assist parents in setting up behavioral plans in the home. The district also contracts a full time Licensed Social Worker to assist families in locating and applying for Behavioral Health Rehabilitation Services.
5. Describe the district restraint procedure.

When an intervention is necessary to address problem behavior, the positive techniques and types of intervention chosen for a student should be the least intrusive necessary. Restraints to control acute or episodic aggressive behavior may be used only when the student is acting in a manner that presents a clear and present danger to the student, other students or employees, and only when least restrictive measures and techniques have proven to be or were ineffective. Restraints to control acute or episodic aggressive behavior may be used only when the student is acting in a manner that presents a clear and present danger to the student, other students or employees, and only when less restrictive measures and techniques have proven to be or are ineffective. The Director of Special Education or designee shall notify the parent/guardian as soon as practicable of the use of restraints to control the aggressive behavior of the student and shall convene a meeting of the IEP team within ten (10) school days of the use of restraints, unless the parent/guardian, after written notice, agrees in writing to waive the meeting. At this meeting, the IEP team shall consider whether the student needs a functional behavioral assessment, re-evaluation, a new or revised positive Behavior Support Plan, or a change of placement to address the inappropriate behavior. The use of restraints shall not be included in the IEP for the convenience of staff, as a substitute for an educational program, or employed as punishment. Restraints may be included in an IEP with parental consent only if: 1 . The restraint is used with specific component elements of a Positive Behavior Support Plan. 2. The restraint is used in conjunction with teaching socially appropriate alternative skills or behaviors. 3. Staff are authorized to use the restraint and have received appropriate training. 4. Positive Behavior Support Plan includes efforts to eliminate the use of restraints.

## Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than $\mathbf{3 0}$ days for an appropriate educational placement.
The data for 2023-2024 was reviewed by the Director of Special Education. Northern Lehigh has not had any students with instruction in the home, homebound, or intensive interagency students for more then 30 days. Students with an increasing level of need at all levels are difficult to place into programs that are appropriate. The district utilizes area resources, agencies, private schools and businesses, as well as the services of the Carbon-Lehigh Intermediate Unit and their transition specialists to maintain appropriate placements for all students. In recent years with the addition of VIA, OVR, SEED, and ARCH, students have had paid opportunities. Often the behaviors impede successful continuation within the programs, and coordination with mental health agencies are helpful in supporting such students. Students with fulltime emotional support needs at the elementary level have also historically been difficult to find placements for in our district. The district has created a full time emotional support classroom in the K-2 building based on district needs. We currently utilize IU programs as well as private schools for those in grades 3-12. However, through the use of learning support staff, emotional support staff and trained paraprofessionals, we have been able to maintain some of these students successfully within our emotional support programs.

# Signatures \& Affirmations 

Approval Date

## Uploaded Files

NLSD_Affirmation.pdf

- $\quad x$ There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- $\quad x$ The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- $\quad x$ The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- $\quad x$ The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- $\quad x$ The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- $\quad x$ The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
